

 **PEOPLE BEFORE PROFIT**

CLIMATE ACTION NOW!

“

A Message from Bríd Smith . . .

Urgent action is needed on climate change. If we do not act now, there will be serious consequences for us and our children. Climate change is the defining issue of our generation. The young people are showing the way and the politicians need to follow their example.

”

I have been taking this message into the Dáil, and have submitted a ground breaking bill that could see fossil fuels left in the ground. The big parties have been blocking that bill. But if I am elected again, I will challenge them every step of the way.

VOTE **BRÍD**

Dublin South Central

SMITH

1

Bríd Smith has been leading the fight on Climate Change.

In just the last few months she has:

- Submitted the Climate Emergency Measures Bill to keep fossil fuels in the ground.
- Fought Fine Gael efforts to block climate legislation by abusing the 'money message'.
- Organised public meetings in Dublin South Central to let people have their say on environmental issues and local impact.
- Campaigned for urgent action to tackle the fact that Dublin South Central has the worst air quality in Ireland.
- Worked with international activists to end the importation of fracked gas through the Shannon LNG project.
- Joined local residents to both maintain and clean-up local green spaces.
- Worked with community groups to develop plans for bio-diversity space along the banks of the Liffey.

Bríd has appealed to those in the Green Party not to go into coalition with either Fianna Fáil or Fine Gael.

**Their last coalition with Fianna Fáil was a disaster for the environment.
We need to break the FF/FG cycle, in order to urgently address the future of our planet!**
